

The Procopi spa collection

portable & in-ground spas

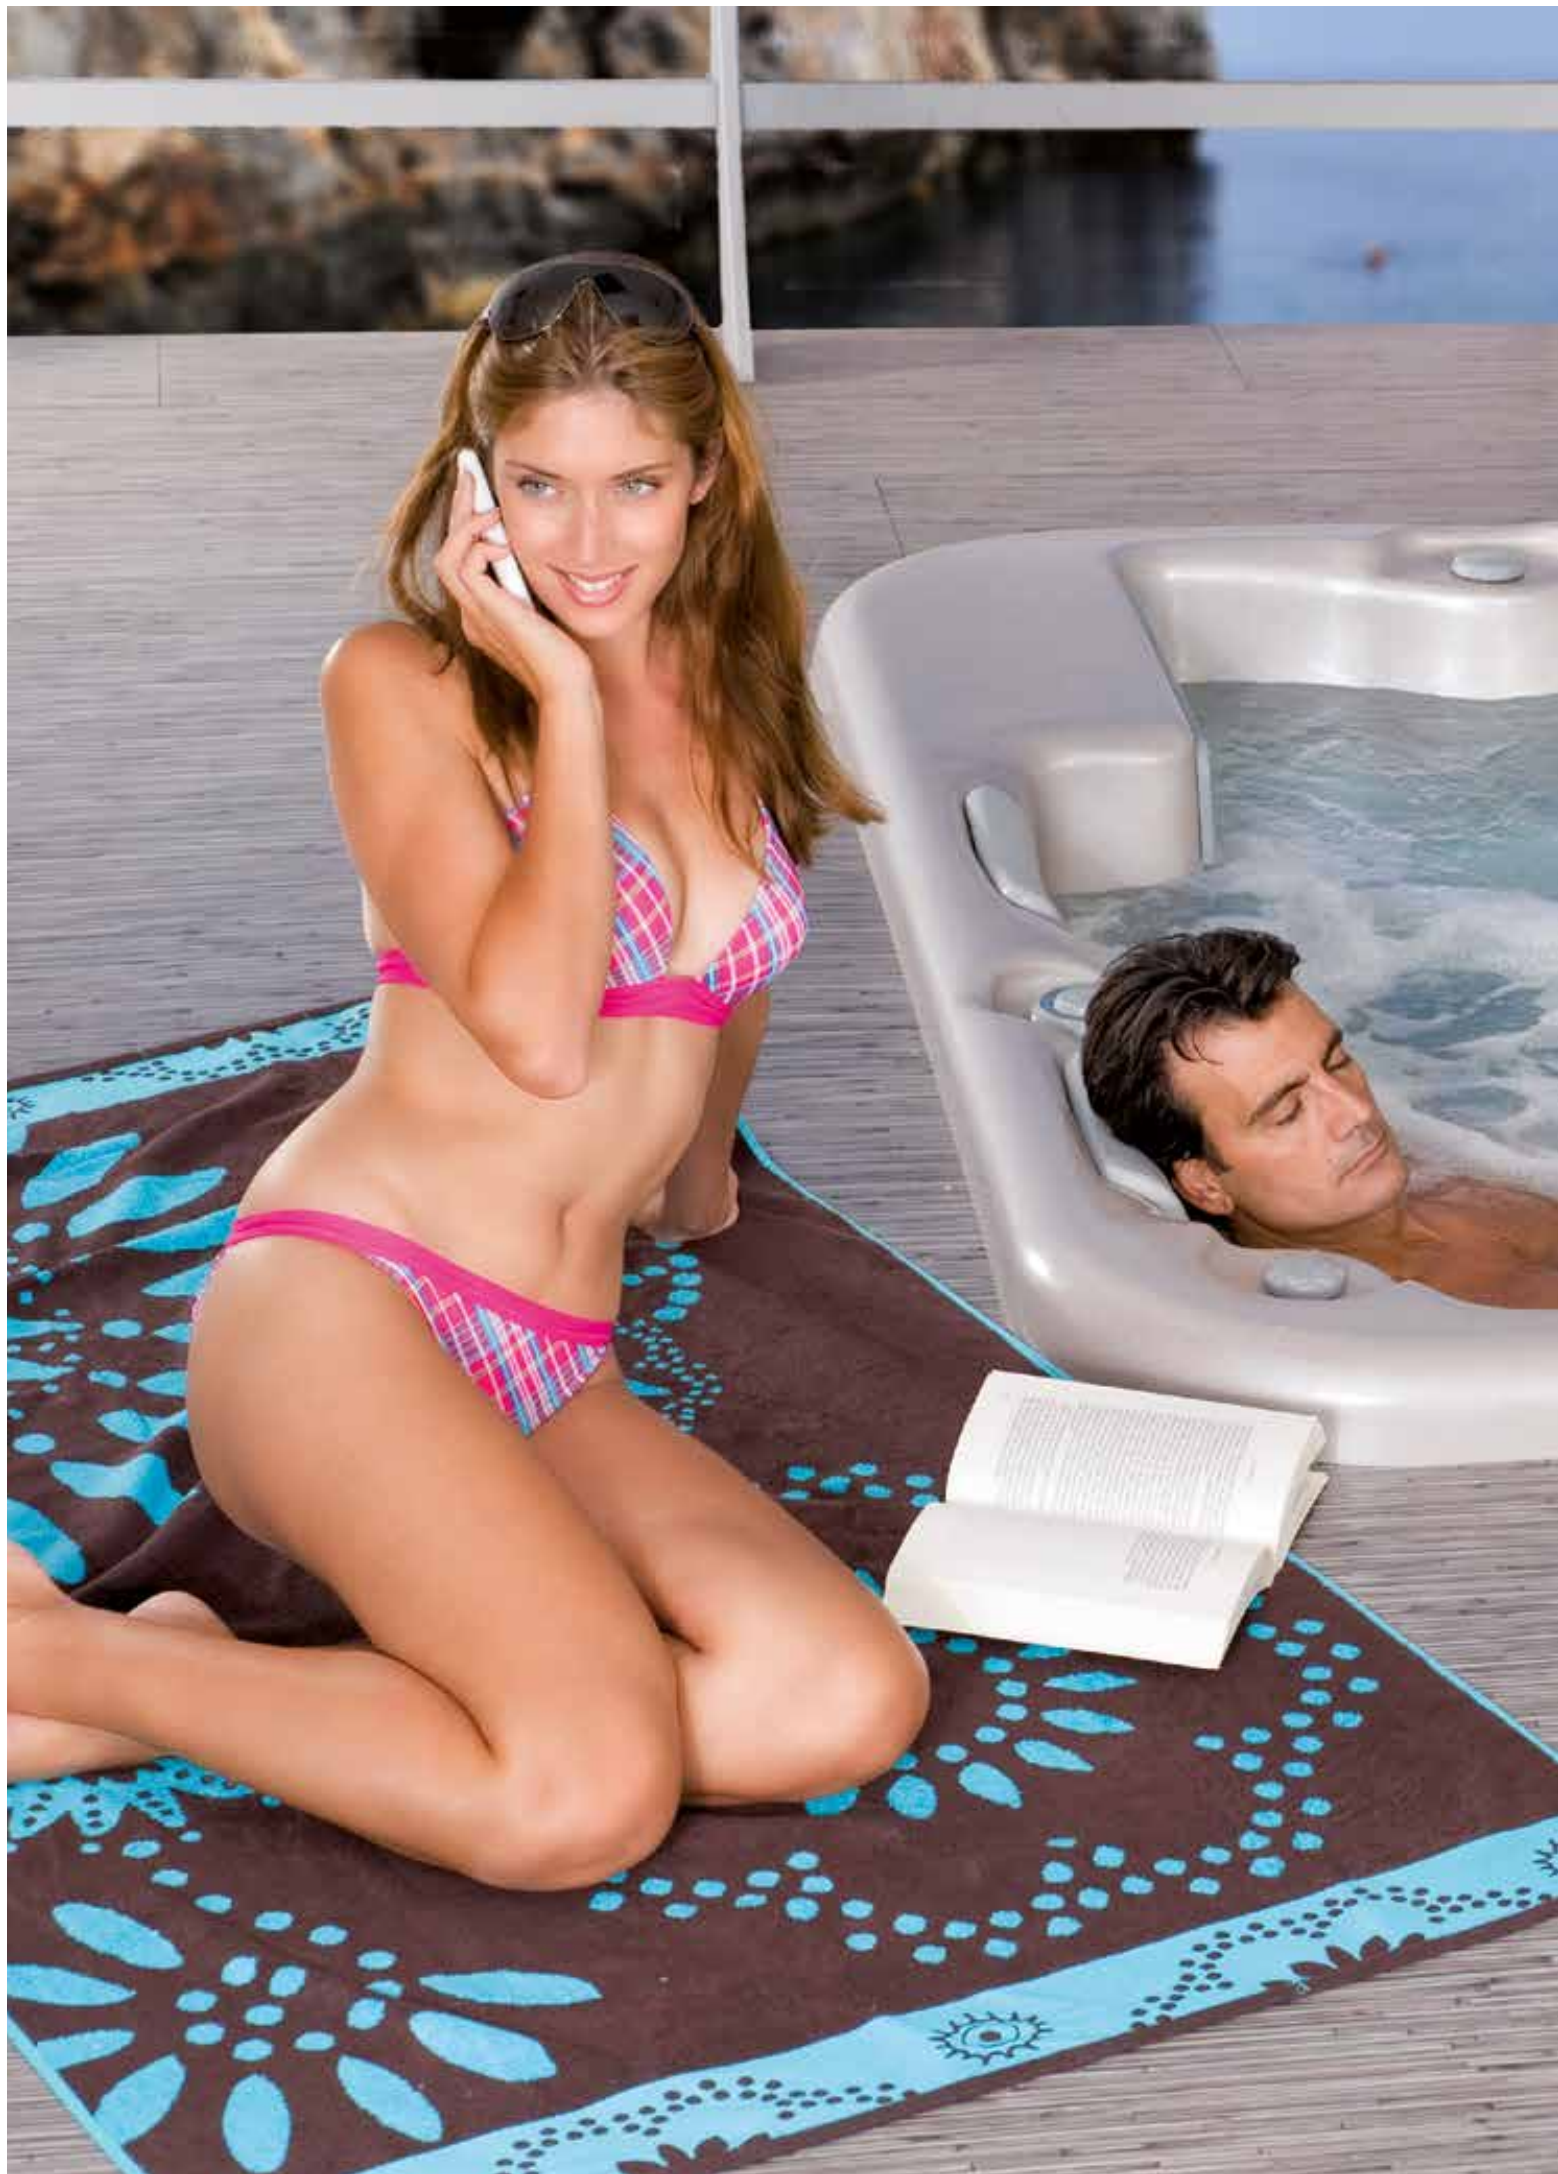

YOU'VE NEVER FELT THIS GOOD...

In our fast-paced society, full of stress and tension, it is sometimes nice to allow yourself a moment of respite, a few minutes in the intimacy of your own home to let yourself sink into a warm, soothing oasis of pummelling relaxation.

To procure this sensation, a great deal of thought has gone into the design of each of our spas. The shape of the seats, the types of jet used and their orientation, the equipment, everything down to the finish of each spa has been carefully and meticulously designed to enhance the pleasure of your spa experience. Procopi offers a novel, unique experience of total well-being.

A woman with long brown hair, wearing a bright pink, sleeveless, form-fitting dress, is smiling and looking towards the camera. She is standing next to a white hot tub with a grey wooden-textured base. The background is a modern interior with large windows and a staircase.

PROCOPI SPAS

ERGONOMIC & AESTHETIC

Each spa belonging to Procopi's range is an example of ergonomics and aesthetics in perfect harmony. Whether indoors, in your garden or on your terrace, our spas will lend an undeniable charm to your surroundings. Reclining on their sumptuous seats, you will discover that every line of our spas has been designed to follow the shape of your body and maximise your comfort.

ALL YOU NEED, FROM A TO Z

Wave good-bye to worries about materials or configurations. With Procopi spas, we made the deliberate decision to extend your peace of mind down to the tiniest detail of your spa. Equipped to the max, they will charm the most demanding user: massage pumps, digital display, multi-colour LED underwater light with dimmer switch, Red Cedar or composite wood steps, rigid cover... each spa comes with everything you need for complete and instant gratification!

SIMPLE TO INSTALL& EASY TO USE

With the spa pack mounting plate and pre-programming, Procopi spas couldn't be easier to install.

Their ease of installation is matched only by their ease of use. Touch control panels with digital display, air jet controls, diverting valves... just press or twirl and a wave of bubbles will unfurl over your body.

THE INDOOR SPA

Rio is the perfect choice to transform any indoor space into a haven of well-being, ease and respite. Two form fitting loungers arranged face to face ensure unforgettable moments of relaxation and awakened sensation. Rio is only 66 cm high so you can easily get in and out without using steps. Furthermore, its low lines make it easy to manoeuvre through narrow interior doors. Like all Procopi spas, Rio comes with top of the line fittings.

CHOOSE WELL-BEING...

WELL-BEING

Step into a Procopi spa, and enter a world of physical and mental well-being. Sink slowly into the deliciously delicate, caressing water. Designed by top engineers, the spa lines gently follow the contours of your body for absolute comfort and flawless pleasure. Embraced in gentle well-being, your tension melts away, your body lets go, your mind is liberated. You discover a state of complete relaxation. Well-being, serenity, beauty, harmony, conviviality... Procopi might not manufacture happiness but it certainly generates all the feelings that invoke it!

CONVIVIALITY

What better than a Procopi spa for wonderful moments with loved ones, with family or among friends? In the evening, at the weekend, come together for an intimate escape with the one you love or tender interludes with your children. After a lunch, dinner or cocktails your guests will enjoy prolonging the evening around your spa.

A Procopi spa is a must to satisfy your family, get closer, delight your friends and create memories full of complicity, happiness and conviviality.

In-ground version

All Procopi's in-ground spas are delivered with a wooden structure to facilitate installation and attachment of the spa pack mounting plate. The structure allows the spa to be delivered flat, making it very easy to handle at the installation site.

Portable version

All Procopi portable spas are delivered with steps made of either solid Red Cedar or composite wood. All Procopi spas can be fitted with remote installed spa packs that can be placed up to 7.5 m from the spa to enhance bathers' comfort.

Steps Practical & aesthetic

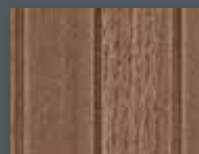

The portable version features a surround made either of solid Red Cedar or composite wood. An indispensable accessory, the steps comprise 2 sections that fit together cleverly into a compact unit that can house the spa pack. They provide safe and effortless access to the spa as well as fast and easy access to the spa pack.

Wooden surround

The portable version features an elegant surround made of either solid Red Cedar, 7mm thick, or composite wood in one of three colours; Grey, Coral or Havana.

All Procopi spas, portable and in-ground, existent are available in Quartz, Beige quarite, Marbled white, Bronze, Crystal black and Pearl

Shell colour

Aromatherapy

Discover the virtues of aromatherapy...

Relaxing, invigorating, refreshing, bewitching, choose a scent to match your mood and feel the effect of fragrance on your mind and body.

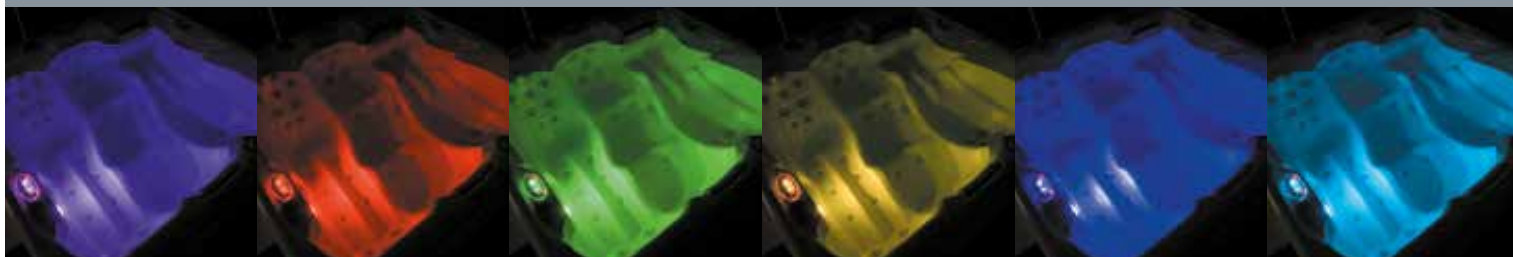

Create your atmosphere!

Warm and welcoming, highly charged, romantic... use your spa's various functions to match the ambiance to your mood.

With the brush of a fingertip you can dim the LED underwater lights or even change their colour, choose from 13 different colours and 7 lighting programmes to adjust the speed and intensity.

Atmosphere

TECHNOLOGY

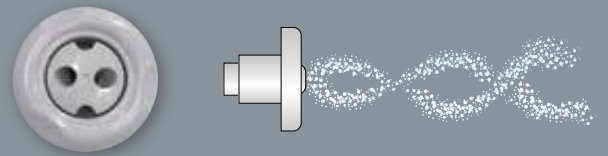

Procopi gives you complete control over every aspect of your spa experience; lighting, massage intensity and fragrance; total freedom to set your own scene. Graze a finger across the touch pad to command the colour and intensity of the LED underwater lights or regulate the intensity of your massage. Invigorating, inviting, relaxing, romantic; you can choose the settings that reflect your preferences and capture your mood. To take this sensual experience a step further, use the aromatherapy dispenser to diffuse a subtle veil of fragrance around your spa.

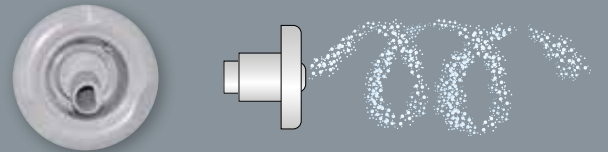

An ocean of bubbles yours to command

The blower sends out thousands of bubbles that effervesce to the surface providing a powerful massage or voluptuous sensations, whatever you command.

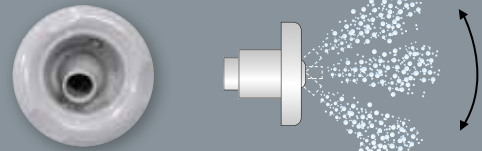

After a long day full of stress and exertion, there is nothing like a good massage to restore the well-being of your mind and body. Our spas possess between 18 and 44 massage jets, depending on the spa, each one meticulously designed and positioned to ensure the optimum massage. A feather touch or kneading strength, targeted or diffuse, you can choose precisely what you want, exactly what you need...

Mini-jets

Air massage jets

Interchangeable, powerful massage jets

Isothermal cover

The isothermal cover prevents evaporation of water making it possible to maintain water temperature at the set-point. This is important to ensure that your spa is always ready when you are.

These covers are fitted with a locking mechanism that secures access to the spa.

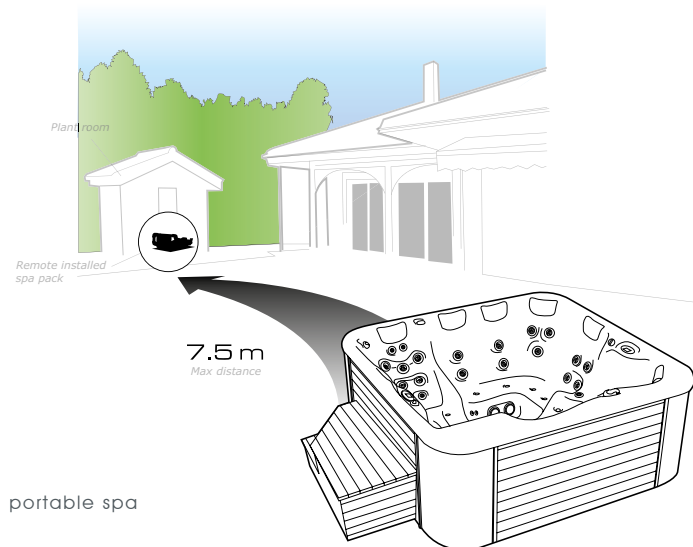

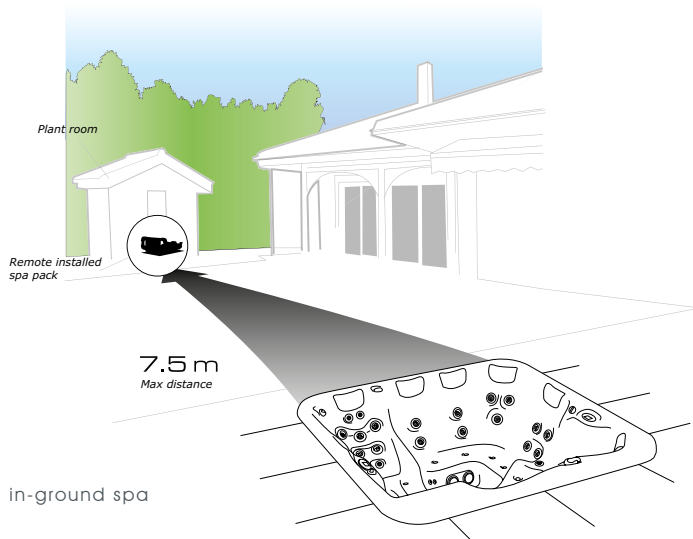

The A.F. (anti-bacterial felt) spa insulation that is fitted to every spa belonging to the Procopi range constitutes a huge breakthrough in terms of insulation. It comprises an aluminium (thermos effect) lined anti-bacterial felt, 6 mm thick, that is attached to the spa structure and the spa pack mounting plate with Velcro. This system provides effective sound-proofing and thermal insulation but can be quickly and easily removed to gain access to the pipe work.

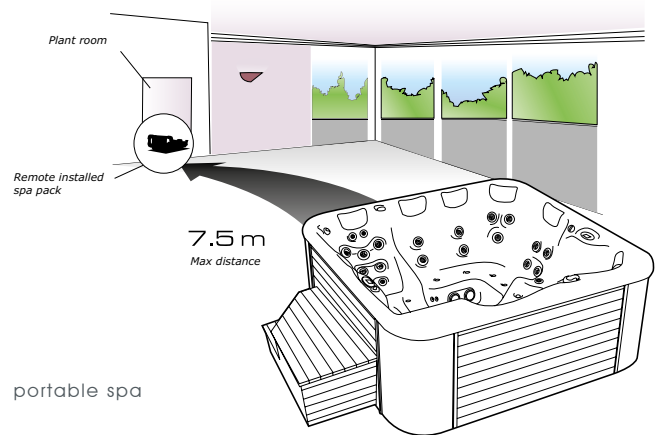

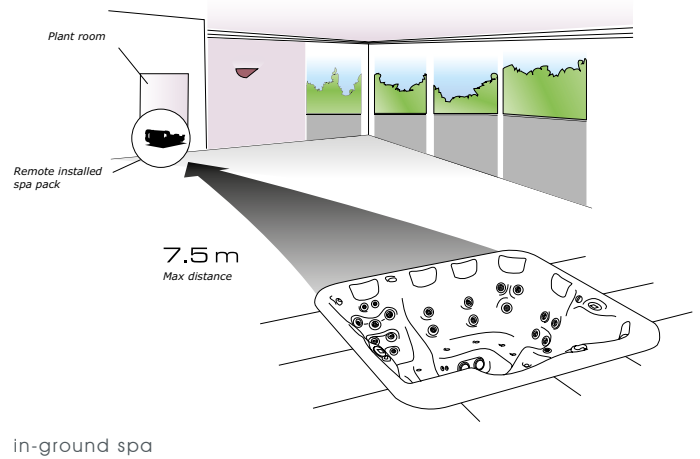

A.F. spa insulation

Outdoor

Indoor

Remote installation spa pack & kit

Remote installation kits, created exclusively by Procopi, are available to allow installation of the spa pack at a distance from our in-ground and portable spas. These kits comprise 7.5 metres of the various tubes and hoses required to connect the spa pack (blower, heater, ozonator, two speed pump and massage pumps).

Listen to the silence

Compatible with portable and in-ground spas, the spa pack can be installed up to 7.5 metres from the spa, the only sound that intrudes on your quietude is the murmur of bubbles gently popping at the surface.

Modular, quiet spa packs with extremely powerful pumps

The Procopi spa pack concept combines ease of use with an effective massage. Located under the steps of a portable spa, the spa pack is easy to access and installation is fool-proofed by the spa pack mounting plate.

The massage pumps are designed specifically for the hydraulics of the Procopi spas, thus ensuring an exceptional massage experience.

The SP1200 spa pack comprises (Copacabana):

- 1 Spa pack mounting plate
- 1 Ozonator
- 1 Two-speed pump, 2 HP
- 2 Massage pumps, 2 HP
- 1 Electric heater, 3.5 kW
- 1 Control panel with electronic controls and a digital display
- 2 Multi-colour LED underwater lights with dimmer switch
- 1 Blower 29 A - Flow rate: 26/m³ (spa pack electrical current requirement)

The SP800X spa pack comprises (Mojito and Margarita):

- 1 Spa pack mounting plate
- 1 Ozonator
- 1 Two-speed pump, 2 HP
- 1 Massage pump, 2 HP
- 1 Electric heater, 2 kW
- 1 Control panel with electronic controls and a digital display
- 1 Multi-colour LED underwater light with dimmer switch
- 1 Blower 21 A - Flow rate: 26/m³ (spa pack electrical current requirement)

The SP800 spa pack comprises (Pina Colada) :

- 1 Spa pack mounting plate
- 1 Ozonator
- 1 Two-speed pump, 2 HP
- 1 Electric heater, 2 kW
- 1 Control panel with electronic controls and a digital display
- 1 Multi-colour LED underwater light with dimmer switch
- 1 Blower 14 A - Flow rate: 26/m³ (spa pack electrical current requirement)

The SP601 spa pack comprises (Rio):

- 1 Spa pack mounting plate
- 1 Ozonator
- 1 Two-speed pump, 2 HP
- 1 Electric heater, 2 kW
- 1 Control panel with electronic controls and a digital display
- 1 Multi-colour LED underwater light with dimmer switch
- 1 Blower 14 A - Flow rate: 26/m³ (spa pack electrical current requirement)

Blower

The blower, available as an option, allows you to add an ocean of air bubbles. Associate this option with aromatherapy to revel in new sensations of total well-being and relaxation.

Filtration and Ozonator

Spa water is filtered through two top quality cartridges located in the skimmer body (only one cartridge in the Rio spas). The water flows through these cartridges before being treated with ozone.

The spa pack features an Ozonator that generates ozone from air. Ozone is a powerful oxidising agent and an efficient disinfectant. It contributes to the sterilisation process and helps reduce the quantity and cost of treatment chemicals.

Taking care of your spa

FILTRATION CARTRIDGE

Procopi, simple to use. Direct access facilitates changing of the filter cartridges. The dual cartridge filtration system (one cartridge in Rio spas) renders filtration more effective and increases maintenance intervals.

TREATMENT CHEMICALS

Water pH:

To optimise water disinfection and ensure that the spa water remains gentle on users' skin, the pH should be maintained between 7.0 and 7.6. Test the pH regularly and use AQUAPLUS or AQUAMINUS to adjust the pH accordingly.

Ozonator:

The spa's filtration spa pack includes an Ozonator that generates ozone.

Ozone is a powerful oxidising agent and an effective disinfectant. The Ozonator runs automatically while spa filtration is active, bubbling Ozone through one dedicated jet. Given that Ozone's reaction time is approximately 1/10th of a second, the water is treated in the tube and Ozone is no longer active when the water is expelled by the jet. Maintenance of a correct pH level and an adequate concentration of disinfectant is essential. Ozone plays a part in water treatment but is not a substitute for disinfection. The Ozonator has a service life of 3 to 4 years after which time it should be replaced.

AQUACAL:

- Prevents the deposition of limescale on the spa walls and in the pipes
- Inhibits the precipitation of calcium carbonate
- Prevents water from turning cloudy

A start-up kit is enclosed with each spa, this kit comprises:

- 1 Anti-foaming agent
- 1 Oxyspa (active oxygen)
- 1 Aquaplus
- 1 Aquaminus
- 10 test strips
- 1 measuring glass
- 1 operating manual

AQUAFILTRE:

- Limescale remover for filter cartridges
- Eliminates limescale depositions and sediment
- Restores the throughput of filter cartridges

OXYSPA:

- Contributes to disinfection of the spa using active oxygen
- Destroys bacteria
- Eliminates organic impurities suspended in the water
- Compatible with other water treatment systems

ANTIMOUSSE SPA:

- Prevents the formation of foam in the spa

SHOCK CHLORINATION:

We recommend that a shock chlorination treatment be carried out once a month to eliminate any microbial residue that could adapt to the system used to disinfect the water and then thrive in inaccessible areas (water and air circuits).

Product: AQUACHOC 60 granules.

Dose: 20g per 1,000 litres of water.

Pour the dose into the skimmer while filtration is running, preferably after a session, to allow the chlorine time to act and be eliminated before the next time the spa is used.

Create a unique look

With its ready to tile surfaces, MySpa Concept allows you the freedom to choose a finish, colour and style that reflects your personality.

MySpa Concept, is the ideal solution to make your spa a key element of your design, both indoors and outdoors.

RIO
