Making the swimming pool easier

Imméo

The reference in in-ground covers

Pool cover product number 27200

This product complies with the NF P 90-308 norm

Security pool cover which prevents access to the pool
for children under the age of 5.

Immeo pool cover combines
comfort and elegance
for all those who want
to preserve the aesthetics
of their pool. It suits most
of new or existing pools
with minimal work.

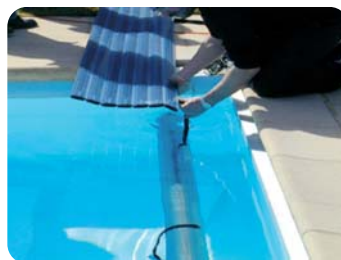

Easy to install, fast and with no surprises

1 Reception of the pre-assembled kit

2 Assembly of the components

3 Installation in the pool

4 Testing and commissioning

- **New generation of PVC slats with large section, anti-stain and UV resistant** which are compatible with the salt electrolysis treatment.

Not recommended in high sun areas

Warm free of charge the water of your swimming pool

solar

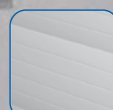

- **Duckboards made of Ipe**, an exotic wood suitable for outdoor conditions and aquatic environment.

- **White, sand-coloured or grey PVC duckboards**, UV and stain-resistant.

- **White, sand-coloured or grey PVC separating wall**, stain-resistant with high section, strengthened.

- Cover usable all year round.
- Motorization compacts integrated into the axis.
- Indicative Weight: 5 kg/m².

Protect effectively the mechanical elements of the cover against the corrosion

Everything has been planned to facilitate the installation:

- Only half a day's work for an authorized Hydra Système installer.
- A simple electrical connexion (no major work or damage).
- It limits work for the retrofitting of existing pools.

Easy to use with automatic end stop

- Opening and closing in one movement by using the key control button.
- Convenient, the cover is designed to stop automatically at end stop.
- Can be operated by a single person. Opening or closing in less than 2 minutes (for a pool measuring 5x10m).
- Advice on wintering: do not drain the pool. Place wintering buoys under the cover.

Warning:
This cover is not to replace common sense or individual responsibility. Nor is it to replace the vigilance of parents and/or adult responsibility as they remain the essential factor for protecting young children. It takes less than 3 minutes for a child to drown.

Opening or closing your pool as quickly and effortlessly as possible is still the safest way of limiting any risk of accident. **Warning:** the cover should only be operated by an adult. Keep the key out of reach of children.

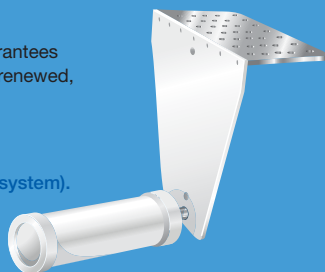

Imméo a concentration of innovations

OPTION

The fastening system created by HYDRA SYSTÈME: The technical reference

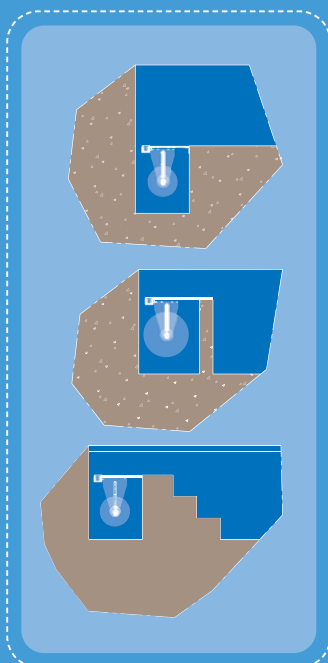

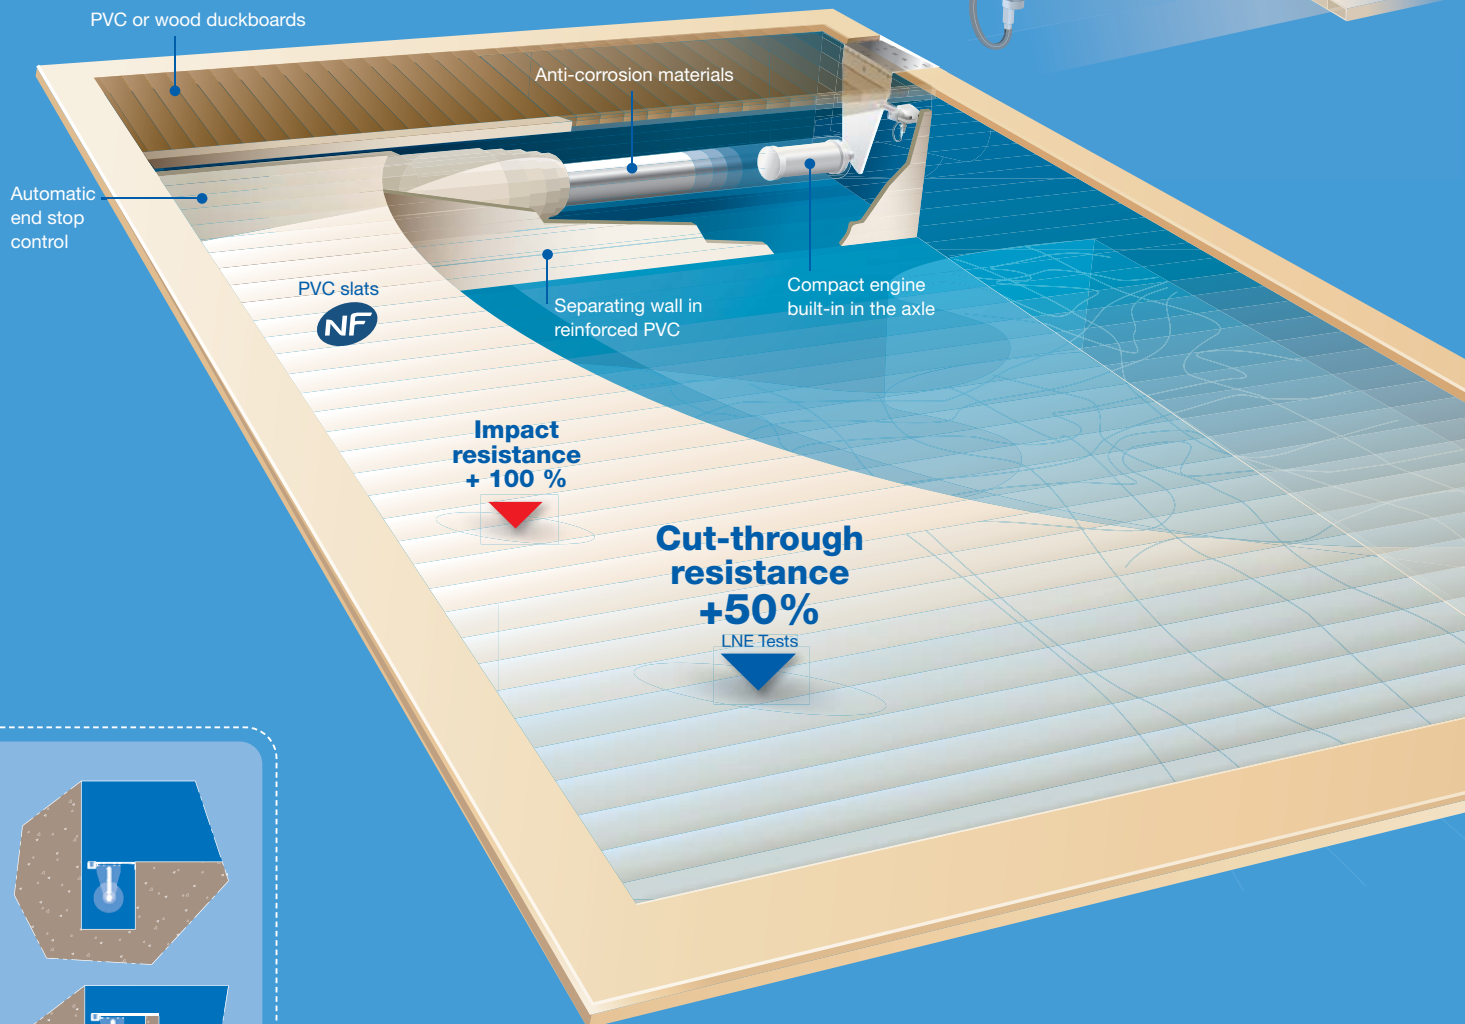

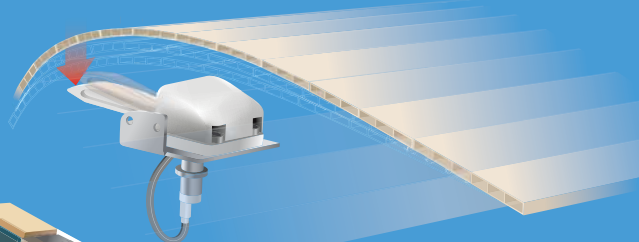

With thousands of covers already sold, the design invented by Hydra Système guarantees the installation in all types of pools, new or renewed, with the minimum work.

- No parts to be sealed: the waterproof system is preserved.
- No adjustment work (dry box for engine system).
- Quicker and cheaper installation with simple electrical connection.

A Hydra Système exclusivity: the Unlocking Control System

The Unlocking Control System automatically detects any abnormal cover tension. The sensor controls the motor to switch off instantly and protects the cover against damage caused by any failure to lock safety hooks.

OPTION

3 possibilities of setting-up
in bottom of the pool
(consult us)

Make the pool safe with one simple movement

- Swimming is a time of conviviality and relaxing. By choosing the pool cover, you opt for the most discreet solution, the most aesthetic and, above all, the safest solution. The pool cover protects you from intrusions into the pool, unlike other safety systems.

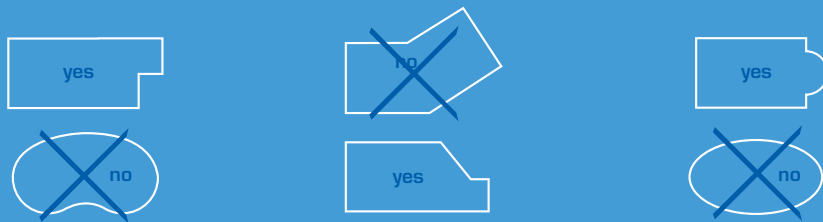

With the pool cover, **also make savings** on water treatment and in heating costs

- It protects the pool against the dirt.
- It limits evaporation and temperature losses.

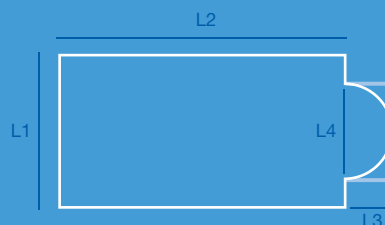

Prepare your pool cover project

- IMMÉO is suitable for most 3 x 5.5 m to 6 X 12 m pools, within a compatible shape (see examples below).
- Our pool covers are not compatible with an immersion alarm.

Warning: In order to answer to all safety features, the gap between the border of the pool and the border of the cover must not exceed 70 mm.

This result can only be obtained by giving the plan to the pool manufacturer. This plan should precisely show the pool length and width measured at every metre. The minimum and maximum water levels requested are at +/- 3 cm of the nominal value. The minimum water level for the wintering period must respect these conditions.

The guarantee of a famous brand

- By choosing the Hydra Système brand, you have the guarantee of a rapidly installed product, easy to use, and long-lasting. You also have support and spare parts for many years with over 500 dealers in France and abroad.
- Hydra Système has been in the pool business since 1996. By giving particular attention to the reliability of its products and to the simplicity of integration in all types of pools, by innovating constantly to combine quality and savings, Hydra Système has rapidly become the first French manufacturer of in-ground covers. In the knowledge of this experience and of multiple patents coming from research and development, Hydra Système has developed a full range of pool covers in order to answer to the safety, aesthetic and budget needs of pool owners.
- As we believe that every pool is unique, Hydra Système pool covers are entirely made-to-measure, taking into account the specificities of each pool and using only quality materials especially adapted to the requirements of modern pools. They are entirely designed and manufactured in France and are guaranteed for 3 years.
- Hydra Système is the only French manufacturer of pool covers certified with the NF brand in pool equipment. It is also the only manufacturer of pool covers to be certified ISO 9001-2000.
