

IntelliFlo3<sup>®</sup> VSF Pool Pump conveniently connects to applications that benefits both the pool professional and the pool owner.

### PENTAIR PRO APP FOR POOL PROFESSIONALS

#### Full Control and Access of the Pump via the Pentair Pro App

- Installations are easy when you connect to the pump via *Bluetooth*<sup>®</sup> wireless technology or WiFi to set up and configure the pump.
  - Configure settings and limits.
  - Set schedules and speeds.
  - Set pump address (automation).
  - Configure relays (optional I/O board).
- Ability to automatically invite homeowner to Pentair Home via email.
- Remote visibility of pump status and operating conditions via Remote Monitoring.

### PENTAIR HOME APP FOR THE POOL OWNER

- Control from anywhere, any time.
- Remote access via WiFi or *Bluetooth*<sup>®</sup> wireless technology connection.
- Set schedules and manage pump settings via mobile device.
- Coordinate with service professionals or request remote monitoring services.

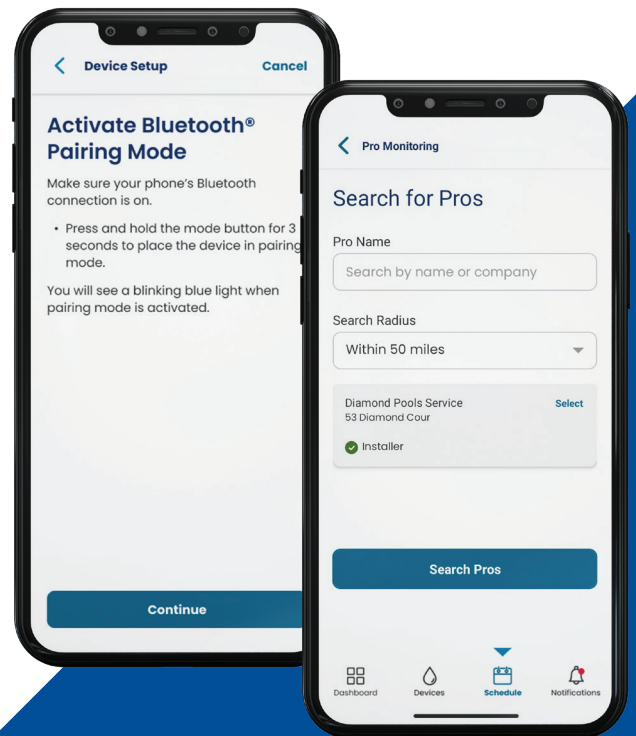

#### WiFi or *Bluetooth*<sup>®</sup> Wireless Technology

#### IMPORTANT NOTE: WiFi Connection

Even if the pump is connected to and controlled by automation, it can and should be, connected to WiFi. This allows for over-the-air software and firmware updates.

### SERVICING BENEFITS

- Offer increased level of service and increased peace of mind to the homeowner with remote monitoring via the Pentair Pro app.
- Efficiently plan out your route or know what you are getting into before they arrive at the job.
- No longer need to go to job to flash software updates to the pump. It is handled by Pentair with over the air updates.
